

Greek Sign Language, Polish Sign Language, and Swedish Sign Language

Module type: Exercise

Class: Phonetics

Keywords: Signed languages, Greek Sign Language, Polish Sign Languages, Swedish Sign Language, signed language articulation

Instructions*

For each of the following signs for DOCTOR from three different signed languages, list which **joints** are used for manual movement during the sign (any flexing, abduction, rotation, etc.). Do not count any initial or final movements required to get the articulators into and out of position, just the movements that occur during the main part of the sign.

- a. Greek Sign Language (Ελληνική νοηματική γλώσσα):
